

# NGC Enterprise Resource Planning

MANAGE BUSINESS, IMPROVE THE BOTTOM LINE

NGC's Enterprise Resource Planning (ERP) solution was designed specifically for the needs of apparel, fashion and footwear brands and retailers. Offering the flexibility to run all types of fashion and apparel companies, NGC's ERP software is the ideal solution for rapidly growing businesses. The extensive toolset provides everything that's needed to manage critical business transactions – from orders to deliveries, planning to production, raw materials to finished products, and more. With extensive reporting capabilities, information is available to make better business decisions to compete in today's market.

NGC's ERP seamlessly integrates with NGC's PLM and SCM solutions, for end-to-end visibility across the Connected Enterprise. Manage style development, sampling, costing and approvals in Andromeda PLM and pass the information to ERP once the style is adopted. After writing a production purchase order (PO), NGC's Andromeda Supply Chain solution can distribute, track and manage the audits associated with the PO, tracking the shipments to their end destination. Once received, the information is passed back to ERP for financial and inventory purposes.

With options to be deployed as an on-premise solution, or in the cloud as a SaaS/subscription, brands and retailers can choose what's best for their business.

## Key Benefits

- **Improve operational productivity**  
by integrating and streamlining all functional areas within the enterprise.
- **Increase profit margins**  
by identifying high cost business transactions.
- **Generate higher inventory turns**  
and enhance working capital.
- **Reduce chargebacks**  
by complying with customer requirements.
- **Leverage integrated EDI**  
and raise customer satisfaction levels by improving performance and providing timely, accurate information.

## ERP at a Glance

### EXECUTIVE DASHBOARDS

- See real-time data and track key performance indicators (KPIs) in a single view.
- Compare critical data such as sales analysis, inventory value, cash, and more to make better decisions.

### E-COMMERCE INTEGRATION

- Pull online orders directly into ERP.
- Improve inventory management accuracy
- Reduce the time between customer order placement and order shipment.

### CUSTOMER ORDER PROCESSING

- Enter orders quickly and accurately, including rapid order entries, one-click inquiries, bulk orders and more.
- Associate drawdowns, multiple price levels and currencies, and stores and DCs.

### INTEGRATED EDI

- View EDI processes and transactions in a single dashboard.
- Validate and process orders in the control center, automatically.
- Notify users when orders come in and updating order systems.

### MATERIAL REQUIREMENTS PLANNING

- Determine the raw materials required to produce open and forecasted work orders.
- Issue POs to the optimal supplier.
- Track the status until raw materials are received into inventory.

### PURCHASING

- Create POs for full package, manufactured and raw material items.
- Track the status of open quantities, anticipated delivery and related customer orders, once released.

### PRODUCTION ORDERS

- Gain visibility into the production cycle, whether you import finished product or manufacture items domestically.

### SCREEN PRINT AND EMBROIDERY

- Manage the embellishment of pre-assembled products with SPE, including custom or royalty based screen-printed and/or embroidered items.
- Define design, placement, add-on costs, etc.

### ALLOCATION AND RESERVATION

- Assign inventory to open orders, whether it's in stock or in production.
- Print pick tickets, once approved.
- 'Reserve' inventory for future orders to ensure availability.

### DISTRIBUTION AND WAREHOUSE MANAGEMENT

- Create all standardized packing, carton labeling and documentation for shipments.
- Generate import and customs documentation, as well as ASNs to receive shipments with ease into the warehouse.

### INTEGRATED FINANCIAL ACCOUNTING

- Manage all invoices, purchases, chargebacks, RMAs, etc.
- Factor open account, letter of credit, etc. supported.

### COMPREHENSIVE REPORTING

- Choose from several reporting methods, including a standard report library and an ad-hoc report generator.
- Utilize the custom report writer to create a report specific to your needs.

### About NGC

NGC Software is a leading provider of cloud solutions for Supply Chain Management (SCM), Product Lifecycle Management (PLM), Enterprise Resource Planning (ERP), Advanced Quality Management (AQM) and Vendor Compliance (VC). NGC's Andromeda® platform empowers the "Connected Enterprise" by linking retailers and brands with their vendors, factories, suppliers, agents, logistics providers, and other global trading partners into a unified, real-time network.

Trusted by fashion brands and retailers for over 35 years, no other software vendor can match NGC's combination of technology expertise and industry experience. NGC maintains offices throughout the world to implement and support our customers and their international offices. And as a wholly owned subsidiary of American Software, Inc. (NASDAQ:AMSWA), NGC has exceptional financial strength and stability.
