

NGC Shop Floor Control

IMPROVE LABOR UTILIZATION, ON-TIME PERFORMANCE

NGC's Shop Floor Control solution was designed specifically for the needs of apparel, fashion and footwear brands and retailers. Configurable to the needs of any fashion or apparel manufacturing business, our Shop Floor Control solution provides labor and production reporting throughout the entire factory network. Optimize on-time completions and overall operational efficiencies by evaluating plant workload, determining capacity needs, tracking employee performance, and more.

Available in English, Spanish and Simplified Chinese, NGC's Shop Floor Control solution seamlessly integrates with NGC's ERP, PLM and SCM solutions, for end-to-end visibility across the Connected Enterprise.

Key Benefits

- **Increase operational efficiency** through daily workforce performance analysis.
- **Improve payroll accuracy** by scanning barcoded payment coupons to determine employee wages.
- **Reduce labor** costs by reducing off-standard payroll.
- **Increase production output** by improved resource planning and eliminating bottlenecks.
- **View detailed WIP visibility** through multiple reports and inquiries.
